MDExport

Your markdown. Publication-ready in seconds.

Export beautiful PDFs and DOCX files from Markdown with themes, fonts, cover pages, and more.

Products

Product	Distribution	Price
<code>mdexport</code> CLI	npm	Free (MIT)
MDExport for VS Code	VS Code Marketplace	\$5/month

Monorepo Structure

```
mdexport/  
├── packages/  
│   ├── cli/           # Free npm CLI  
│   └── vscode-extension/ # Paid VS Code extension  
├── worker/            # Cloudflare Worker (shared backend)  
├── landing/           # mdexport.dev landing page  
└── README.md
```

Quick Start

CLI (free)

```
npm install -g mdexport  
mdexport export README.md
```

VS Code Extension

1. Install from VS Code Marketplace
2. Right-click any `.md` file → Export as PDF
3. Open command palette → `MDExport: Enter License Key` to unlock Pro

Development

```
# Worker  
cd worker && npm install && npm run dev  
  
# CLI  
cd packages/cli && npm install && node bin/mdexport.js  
  
# VS Code Extension
```

```
cd packages/vscode-extension && npm install && npm run build
# Then press F5 in VS Code to launch Extension Development Host
```

Architecture

Both the CLI and VS Code extension call the same Cloudflare Worker API. The Worker handles:

- Markdown → HTML parsing (via `marked`)
- PDF rendering (via Cloudflare Browser Rendering / Puppeteer)
- DOCX rendering (via `docx` npm package)
- License key validation (via Cloudflare KV)
- Stripe webhook handling for subscription management
- License key delivery via Resend email

License

CLI: MIT VS Code Extension: Proprietary (subscription)
